Gary Pfeifer 308-788-0800

This is a generic set of rules for the 85 & Newer (Old School) & Mini Van Classes. These two classes are separate and will not run together. Cars run with cars & Vans run with Vans.

1. Must be a 1985 or newer car/van/mini-van that has a Liquid-cooled Engine and 5.0L. Cold-air-intake/ram-air-intake ALLOWED (NO AIR-INTAKE, VENT-INTAKE, TURBO/INTERCOOLER, OR CROSSOVER SUV'S ALLOWED) NO FULL FRAME CAR(S) ARE NOT ALLOWED. MUST BE UNI-BODY STYLE CARS/VEHICLES.
2. Must be the original engine in the car (no modifications of any kind).
3. Must remove all outside body chrome, bumper covers, headlights, tail lights, turn signals and window (all glass and plastic objects). This includes all windows or with glass particles. You must also remove all interior pieces not needed (carpet, back seat, headrest, plastic trim, etc.) These items are a fire hazard & safety issue.
4. Must relocate battery to inside of car and must be secured (secured to floor, passenger side floor, Battery in engine compartment must be removed). If the vehicle came from the factory with the battery in the rear seat compartment it may stay as long as it's securely mounted & secured.
5. Must REMOVE all air bags & air bag cylinders in driver's & passenger compartment. Along with side curtain & seat belt air bags.
6. You will be allowed to run a aftermarket or homemade fuel tank in the rear seat area. 8 gallon maximum. The aftermarket tank is allowed to be mounted on the rear floor area or off of the rear seat bar. The gas tank must be made of steel, stainless steel, or aluminum (no plastic tanks allowed) you are allowed to fabricate a "gas tank protector" but must remain a minimum of 12" from the doors, 10" from the speaker deck, and 8" off the floor. You will be ALLOWED to run the factory gas tank in the car as long as it is mounted in front of the rear seat assembly, although it is highly recommended to run a aftermarket tank.

CS PROMOTIONS is making it mandatory that you relocate or run an aftermarket tank for 2021 season.
